

LMIT QB HOMEWORK

1. Why should you take a big first step away from the center before continuing into your drop?

2. Explain the difference between a BIG step and a GATHER step.

3. Why must a QB keep their shoulders level during a dropback?

4. Write the rhythm counts for a 3-step drop.

5. Describe the purpose of a rhythm 3 step drop.

6. Why is there no hitch in quick game?

7. Name three routes that match 3-step timing.

8. Write the rhythm counts for a 5-step drop.

9. Identify which steps are BIGs and which are GATHERs in the 5-step drop.

10. Explain Rhythm vs. crow - hop timing.

11. Name two route concepts for each timing structure. (3step,5step,7step)

12. Write the 7-step rhythm counts.

13. How many BIG steps and how many GATHER steps in a 7-step drop?

14. Explain why over-striding can effect the flight path of the ball.

15. Name three deep routes that match 5-step timing.

16. Why must the QB be loaded and ready on the final gather before they throw?

18. How does keeping the ball under your chin improve release speed?

19. Deep comeback concept: What drop & timing do you use? Explain.

20. Slant vs off coverage: Why does qwk game/ 1 step timing fit? Why does a rhythm 3step fit as well?

21. Deep post-shot: Which drop? Why are we taking a deep drop?

22. BONUS: Why is mastering timing more important than arm strength?

23. How do your eyes sync with your feet in 3-step, 5-step drop?

24. Explain how dropback timing helps offensive line protection. Give an example.
